Challenge & Problem

1. Problem

Students struggle to stay motivated and retain information because most learning tools are focused on individual or competitive learning – not true collaboration.

Challenge & Problem

2. Studies

We know from research (Stanford, 2023)
that collaborative learning increases
retention by 80%, compared to solo learning.

Challenge

retention by 80%, compared to solo learning.

Mentors Interview

Our mentors helped us see that education reform doesn't start with policy – it starts with innovation.
