

DataMapix

DATA FOR EDUCATION

Problem

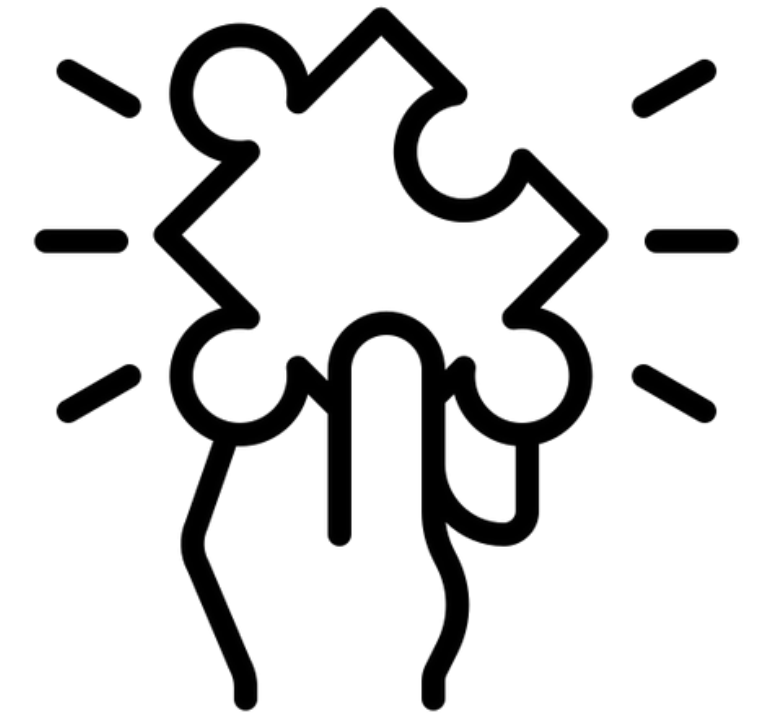

A small amount of data visualization examples in Georgia and not only in the Georgian market.

To solve the problem

To solve the problem, we have created a platform where anyone can use their desired data visualization and clean, accurate, filtered data.

Platform

Target group

Our target group is both students and people who need accurate data-driven visualizations

Competitors

Globally there are competitors, who do this, but these resources and visualizations are not in Georgian, which is not a contributing factor for Georgian society

Business plan

We plan to make money in the future through the services we offer to our customers
