

1) Description:

We are the team **C0D3BUST3RS** and our solution to motivate students to study and keep going is a web page called **Celebrities Core**. On this web page you can filter the category of celebrity and the region where this celebrity comes from. You can find very popular business geniuses as Elon Musk or Bill Gates and also local popular, but successful athletes, for example top latvian basketball player Kristaps Porzingis. We hope to inspire some students to study, by reading stories of success of famous people.
