Describe it in a tweet

Transform remote learning into the ultimate experience: gamified lessons with real-time feedback, interactive student collaboration, and seamless

Innovativeness

The solutions integrates the newest cutting edge technology in a way that has not been done before, with an unprecedented ease of onboarding. There are no solutions that integrate all this technologies for this specific use.

Solution Description

Make remote learning the best way to learn. By providing gamified lessons with real time feedback, interactive collaborations that engage students and provide feedback to the teacher, all while making the teaching process as frictionless as possible.

Target Group

Available initially to students on on an undergraduate level, student seeking to learn remotely without sacrificing the quality of what's learned. This learners want to learn in a way that is as conveniently as possible, while being engaged in a way that encourages learning and high performance.

Transferability

It is applicable to all levels of education, whoever learns in an online format can greatly benefit from the solution, both teachers and students. Schools and independent webinars.

Context

In Fall 2022 (After the pandemic) the percentage of students taking online classes was 53.4%. According to a source by Statista the number of online learners will grow to 920 millions users by 2027.

Impact

Student all around the world partaking in online courses will have a much more improved experience, that increases the quality of engagement and therefore learning quality.

Sustainability

The plan for the product evolves into it's own platform, independent from any other third party solution. It's greatly scalable as the amount of institutions and independents teaching online is increasing by the day.

Team Work

We are an ambitious team with diverse talents that complement each other. We believe completely in the impact of the solution and the profitability of it.
