

**Mentor: The artificial
Intelligence guiding young
People toward the future**

The challenge faced by young people after school

The post school dilemma

Over 120,000 NEETs in Italy face the difficult transition from school to the world of work.

Lack of guidance

Young people often lack personalized tools and effective support to navigate the complex.

Mentor bridges the gap

Mentor was created to fill this divide, offering tailored support that combines advanced personalized technology.

Mentor: What does that mean and how it works?

Your intelligent guide

Mentor is a cutting-edge AI-based application designed to thoroughly analyze each user's profile

- It offers personalized paths with targeted courses, interactive quizzes, and practical challenges to develop key skills
- It assists users in connecting with companies and real job opportunities, acting as a bridge to the market.

AI at the service of personalized guidance

Advanced algorithms

It uses sophisticated algorithms to suggest activities that perfectly match the user's profile.

Feedback and adaption

It provides continuous feedback adapts the educational or professional path based on the user's progress

Simulations and support

Mentor includes tools to simulate job interviews and offers valuable assistance.

Testimonials and real impact

Assistant

“I want to do...!”
The assistant provides guidance.

Spider

Mentor has a ‘spider’ that searches on behalf of the user for job postings, new courses, and work opportunities..

Why Mentor makes the difference

24/7 Accessibility

Constant support accessible from any device, with an intuitive and easy-to-use interface.

Inclusion and employability

It promotes social inclusion and increases job opportunities for young people in a constantly evolving labor market.
