EduBoost - Motivating Students to Learn Better

EduBoost helps students stay motivated and consistent in learning through positive rewards and progress tracking.
Students earn points and streaks for studying, completing homework, or good behavior - and can spend these points in the built-in reward store (for example, to buy a +1 bonus point on a test or other small classroom rewards).
Teachers can track student progress, see achievements, and manage rewards easily.

By turning everyday learning into a game-like experience, EduBoost makes studying more engaging, rewarding, and fun.
