## THE CONTEXT

- ❑ Young people are overwhelmed by expectations, commitments, and pressures we didn't choose, often hindering our dreams.
- ❑ According to the WHO, 1 in 7 young people aged 10-19 suffers from stress, anxiety, and depression, often driven by a school system that pushes them to the limit.
- ❑ In Italy, an ISTAT survey shows over 25% of high school students frequently feel overwhelmed by school stress and fear of failure—every two desks, a friend is at risk of burnout!
- ❑ In 2022, 11.5% of young people aged 18-24 dropped out before completing secondary education.

## **THE MISSION**

**AiCademy using artificial intelligence helps students reorganize their time, set achievable yet challenging goals, and access tailored resources and suggestions.**

**AiCademy is our contribution to building a conscious generation, ready to face the challenges of today and tomorrow.**

**APPUNTI**

AiCademy is a digital platform that brings together the entire educational community to support students, with artificial intelligence acting as the orchestrator.

- **Students:** They will be able to manage daily deadlines and commitments, track their achievements, set goals, and receive suggestions for experiences that align with their dreams.
- **Schools:** They can organize and manage projects and activities, maintain a catalog of initiatives, and improve their offerings based on student participation and satisfaction data.
- **External Organizations:** Schools, sports clubs, and cultural institutions can coordinate through a shared calendar, reducing overlapping events and stress. Students can choose activities that align with their goals and lifestyle.
- **Public Administrations:** AiCademy will serve as an observatory to address critical issues such as transportation, improving accessibility and reducing stress related to the availability of educational and extracurricular content.

AiCademy fosters coordinated management, enhancing the educational experience

# AI - innovative

AiCademy is an AI-based application that also aims to educate students on the use of artificial intelligence.

It teaches students that AI can be an ally in studying, not a substitute for the student, as is often the case when using tools like ChatGPT for homework.

Designed to support students without replacing their efforts, the app does not do the homework or study for the student. Its goal is to encourage active learning, promote autonomy, and develop personal skills.

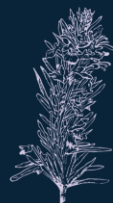

Through innovative and engaging methods, **AiCademy makes studying more effective** and stimulating, while always empowering the student. It is a unique case of personalized planning for the student's life, balancing study and daily commitments without stress, keeping the student at the center of their learning journey.

## Sustainability

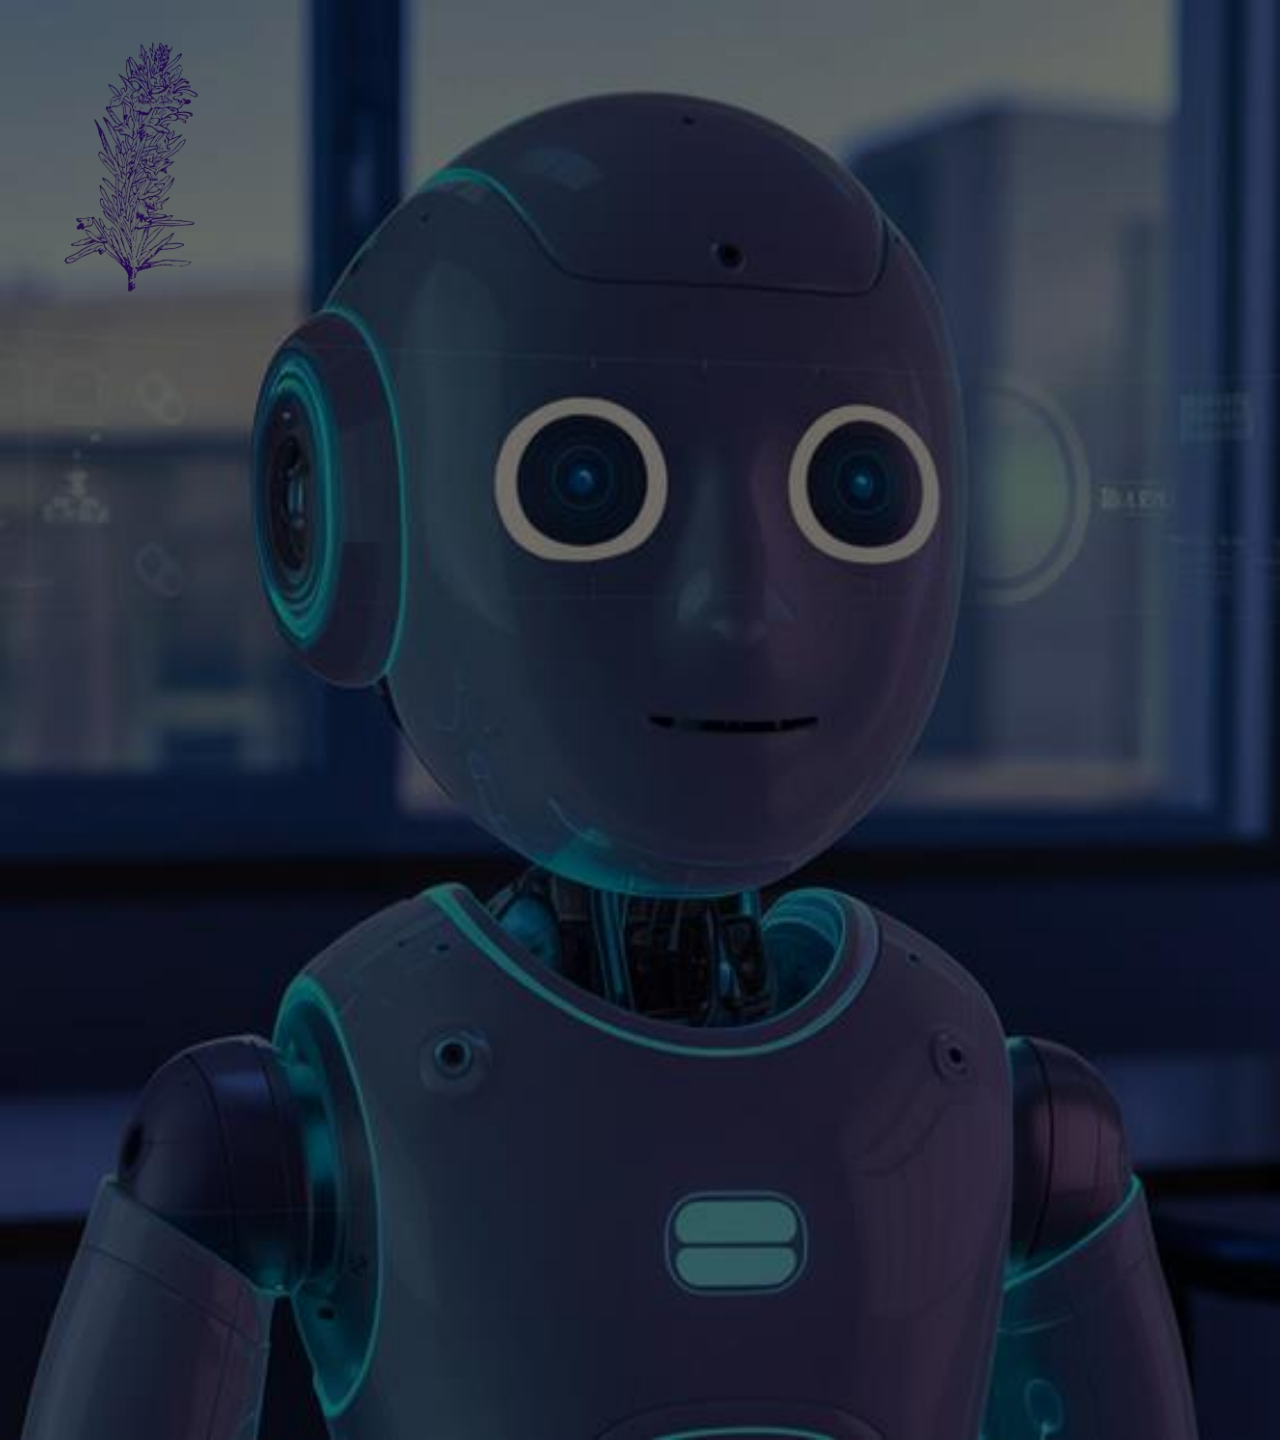

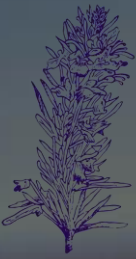

- ❑ Free platform for students, ensuring educational support and emotional well-being are not dependent on financial resources.
- ❑ Accessible to a large number of young people, with a steadily growing user base.
- ❑ Self-sustaining model that attracts schools, generating revenue through subscriptions or contracts with educational institutions.
- ❑ Continuous flow of resources to support the platform's growth and long-term impact on education.

## Teamwork in AiCademy

- ❑ Collaborative approach involving students, schools, and educational institutions working together.
- ❑ User-driven design that allows for continuous feedback and improvement.
- ❑ Students actively engage with the platform while schools and universities contribute to its evolution.
- ❑ Institutions and educators become integral parts of the team, supporting accessible education and emotional well-being.
- ❑ Enhances platform effectiveness through cooperation, empowering students for the future.

AICADEMY

## AiCademy Key Features

- ❑ Transforms study organization into an effective, personalized process.
- ❑ Addresses a key challenge for students: time management.
- ❑ Uses AI to create detailed, adaptable study and life plans.
- ❑ Helps students optimize their time and improve their lives.
- ❑ Broad transferability: can be integrated into educational systems in other countries.
- ❑ Supports mobile students, ensuring continuity in study methods.
- ❑ Adapts to new educational systems, particularly in the Erasmus program.
- ❑ Not limited to high schools: usable in universities, middle schools, and vocational training centers.
- ❑ Dynamic adaptation and progress monitoring features for students of all ages.
