

DigiEduHack Challenge

The Learning Experience

Redesigning the learning experience

Be part of the educational innovation!

In order to change something, you have to start doing something. And preferably differently. We invite students to come up with ideas, how to redesign the learning experience in schools. Together with educational startups and social enterprises we would like to come up with exiting solutions.

Co-create the future of education together with us!

Join our DigiEduHack to connect with other educational professionals, innovators and entrepreneurs to co-create the future of education. Help us solve the challenge of - Redesigning the learning experience - and turn your vision into reality and showcase your solutions on a European and global scale. Experts and mentors will support your team during the 24 hours in finding the best solutions to the challenges. Special awards for the best teams!

How to prepare for the challenge?

Think, how would you like to study in school! Do some research online, to discover which are the best existing practices in the world. Keywords: project based learning, problem based learning, entrepreneurship education, service learning.

Why is it important to find a solution to this challenge?

The world is changing with a rapid speed. Most of today's jobs are created by companies not older than 5 years. When elementary school students will graduate, there will be job positions on the market, which don't yet exist. Instead of buying new things for the school - we should create new solutions. The purpose of education is to train your mind to think - not to know facts by heart. And learning should be exciting and inspirational journey, that lasts for a lifetime. And this process should be fun!
