

## DigiEduHack Challenge Learning Spaces and Pedagogies

# Digitization of schools in rural areas

## How we can introduce digital elements in schools in the rural area

The vision of our school is to find a way to pass all students through a genuine learning threshold, visible to everyone. Digitization can support this. Interactive teaching motivates students and reduces school dropout.

### Beyond books and notebooks

Join our DigiEduHack to connect with other Romanian students. This event involves the use of the Romanian and English language by students belonging to minorities. In this activity, students from different schools will meet and will redesign a place in the school and will exercise communication skills. Students belonging to minorities, will have the support of their colleagues to learn new things and the importance of implication. They will realize that learning is a process that you do not have to go through alone and in which you can have extraordinary moments and meet special people.
