Solution description

MY_P.D

Map Your Professional Development

(An App)

Smart Learning System for Teachers P.D: Adaptive, customized, allows planning, sharing and

contributing to the community throughout professional and lifelong years of career

The system is based on Learning Compass 2030 and offers assistance and advice to teachers in their professional development paths, so that they can teach compliant to Compass 2030 and achieve also their goal- well being. Their learning experience will enable them to help their students achieve their learning compasses.

Two powerful forces are driving the world today: personality and community

This app- MY_ PD was created to connect these 2 forces and gives the teacher his or her learning compass so that he/she can become an effective learner who does not stop developing professionally.

Solution context

Teachers today do not manage their professional learning mainly because you have not given them choice and responsibility for their learning.

In addition, the information about training processes and courses is not easily accessible to them and is not tailored to their needs and their community.

Solution target group

The smart system we have built for teachers characterizes them on the basis of broad data (from various sources) and offers them professional content, values and skills to promote each one personally: timely, convenient location and according to their learning styles . In addition, the system will also allow them to be knowledge makers and contribute from their learning to colleagues to their profession.

Solution impact

Our success will be measured by

1. The amount of participants who help the system in planning their career
2. The quality of the products to be shared on the network
3. The amount of teachers who want to study in different forms even without credit
4. The amount of teachers who contribute to the community and offer improved learning experience with emphasis on 21st century skills

Solution tweet text

The system is based on Learning Compass 2030 and offers assistance and advice to teachers in their professional development paths, so that they can teach compliant to Compass 2030 and achieve also their goal- well being. Their learning experience will enable them to help their st

Solution innovativeness

Two powerful forces are driving the world today: personality and community

This app- MY_ PD was created to connect these 2 forces and gives the teacher his or her learning compass so that he/she can become an effective learner who does not stop developing professionally

Solution transferability

Our solution is suitable for all types of learning and areas of knowledge

Solution sustainability

Step A - Characterization of the app

Step into the design and creation of the app

Step C - Getting started around a number of goals

Phase D - Development of additional layers of information and use

Solution team work

Team work has been extremely helpful and effective.

This is an interdisciplinary team and everyone in the team has a unique contribution to the process and product

creation: academic consulting, digital pedagogy, designers and artists
