## **Gornești - Beyond books and notebooks**

### **Challenge: Digitization of schools in rural areas**

## **Gornesti helping learning in rural areas**

### **Helping learning in rural areas**

How can we help young children and their teachers to learn in rural areas.

### **Team: Kids from Gornesti**

#### **Contact details**

veronica.sandor@yahoo.com

### **Solution Details**

#### **Solution description**

Even if students in rural and disadvantaged areas do not have a computer at home, the school can allow them access to digitization. However, this implies partnerships with other institutions and changing the way teachers work.

#### **Solution target group**

students and teachers from rural areas

#### **Solution impact**

increasing students' motivation for learning

reducing absenteeism

facilitating access to information

the possibility of a faster update for teachers

creating a more pleasant space

## **Solution tweet text**

Digitalization of education in rural areas is possible! We start, be with us!

## **Solution innovativeness**

introduction of SMART TVs into teaching

granting what education in Europe entails

the use of tablets by students at the time in the curricular activities

extracurricular activities in partnership with other institutions

realization of a virtual classroom

## **Solution transferability**

these activities started as extracurricular activities but will be transformed into curricular activities, digitization being used at the course ears. Changing the way teachers work is necessary to keep up with the new generations.

## **Solution sustainability**

The support of these activities will be done through international projects etwinning and erasmus +. Our Gornesti City Hall has already started equipping the classrooms with smart TVs. Associations like ROMA Education found will be with us with activities that will catch the students' attention and bring them closer to the school to reduce dropout

## **Solution team work**

We worked well in team, we chose partners we could rely on and we worked with in projects. We chose motivated people with whom we have common ideas. We will definitely work together again
