Solution Details

Solution description

On the platform people will move timeline by their fingers. According to the time they choose, on the map they will see symbols of kings/queens, cities, war scenes and etc. They will tap them and information about them will arise. They will be tied. Moreover, the platform will have quizzes and competitions on history, in order to make it interactive.

Solution context

The whole platform is about history of Georgia and next - history of the world. It is great solution in respect of lack of awareness in today's world.

Solution target group

Everybody interested in history.

Solution impact

We think that our solution will have a great deal of impact. Nowadays, in Georgia people, especially school students experience lack of motivation when it comes to studying history. It is natural, due to Covid and not only. Reading books could be very boring. With our platform people and especially students will study interesting historical facts with fun, because it will be a game as well.

Solution tweet text

An interactive educational history game platform for people.

Solution innovativeness

Currently, there is no application or a platform which will be as educational, interactive and fun as our solution - when it comes to history of Georgia. Therefore, it is very innovative .

Solution transferability

We can add another subjects. E.G history in anthropological way and etc

Solution sustainability

It has a potential to develop and become a world history map gam

Solution team work

Amazing team. love to continue work with them
