

Accento was born from the merger of two important realities of the Emilian educational landscape: Argento Vivo and Solidarietà 90. These two realities share common values, complementary business strategies and the vision of the same entrepreneurial future combining over 40 years of experience in the educational sector. On 1th December 2017, the two cooperatives join forces, creating Accento Cooperativa Sociale. The purpose was to develop and manage educational services aimed at social integration and improvement of lives of children and young people.

Accento has different principles and values, as the strong belief that everyone, in their uniqueness, has something to give. The participation of different actors for the good realization of our projects is another of these principles. Furthermore, we deeply believe that the enhancement of differences and potentialities can make society more capable and responsible. Consequently, we actively look for the complicity of families, organizations and public and private associations of the territories in which we operate.

Accento has different educational services from the early childhood up to 29-year-olds and include: infant-toddler centers, preschools, recreational services, cultural centers, youth centers, playrooms, career guidance services, integration and intercultural projects, summer camp and summer stays. In addition, we offer parenting support projects, training for parents and professionals in collaboration with various public and private partners. We also organize consultancy and coaching for the opening of new educational services.

Accento Cooperativa Sociale is based in Reggio Emilia and operates in five Italian cities: Reggio Emilia, Bologna, Modena, Parma and Vercelli. Our objectives are shared by about 500 people, coming from different educational and professional backgrounds, of which 300 working members.
