

Digilit

Brought to you by T.O.A.S.T. team

Problem

The lack of digital literacy
among middle-school
students

Why is this problem important?

- Today's school students will live in an extremely digitalized world in future. It is crucial for them to acquire basic digital competencies and to learn how to analyze and process information flows
 - Multiple studies demonstrated that the majority of middle-school students lack basic digital skills around the world
 - Numerous leading IT companies are ready to sponsor and support solutions that help to improve the digital literacy of children of generation Z
- 

Teen survey

• Do you follow the latest technology news?

Can you install and update programs by yourself?

Do you know what programs and why are installed?

Do communication rules work online?

Our solution

Quest

The story that is influenced by the user depending on his or her choice

Quiz

A quick poll on a topic in the format of a competition between two players

Learning Effectiveness

- The player experiences every situation individually
 - The player receives statistics of his actions and recommendations on the completion of the task
 - The competitive aspect of the game is the additional motivation for every player
- 

Prototype demonstration

The prototype was performed using the Figma tool for joint development of software interfaces
