

Mario Bocca

Graduated in Electronic Engineering at the Politecnico di Milano, he began his professional career in Digital Equipment for an international consulting team dedicated to the design of intensive transaction processing architectures for financial markets.

After joining The Stock Exchange Ced in 1990, he was responsible for the Italian Equity Market automation project and then for the provision of related services.

In Ania since 1998 as Chief Information Officer (CIO) he becomes General Manager of the Direct Compensation Consortium where he leads the implementation of the new direct compensation system for the Italian car insurance market.

Since 2007 he is Group CIO of Unipol.
