

Expanding the concept of computer classroom
Easing the use of dedicated software and environment
Making the lab available 24/7
Started by the School of Engineering, Padova University

A virtual environment including software and tools
used by every course
A terminal used by the student
A connection to the virtual environment

Same environment available in class and at home
Students find the environment ready to be used
No need to spend time setting up the software
Licensed software is available to the students at home

The main focus is on learning

A powerful hardware infrastructure
is made available

Students do not need to own
powerful machines

Every classroom can be turned
into a computer classroom

→ **Today: up to 500 sessions can be
run at the same time**

→ **Upgrade: up to 2.000 will be
available soon**
