We connect to contribute

How did they write the script?
It must be a multi-disciplinary
team behind it!
How did they meet?

Problematic?

Virtual Reality

Artists

University projects

Engineers

Programmers behaviors
studies and analysis

Artificial Intelligence
Algorithms for reading a
painter personality

They ≠ We

≠

We offer matching of project collaboration rather than job offers.

We connect people for intellectual projects rather than for dating

≠

≠

Our offer the possibility of Art and science merge in projects rather than scientific papers

Students are our main audience rather than business partners

≠

≠

We offer a targeted community rather than a vague one

We offer one person to one person matching rather than one person to one group matching

≠

Our Goal

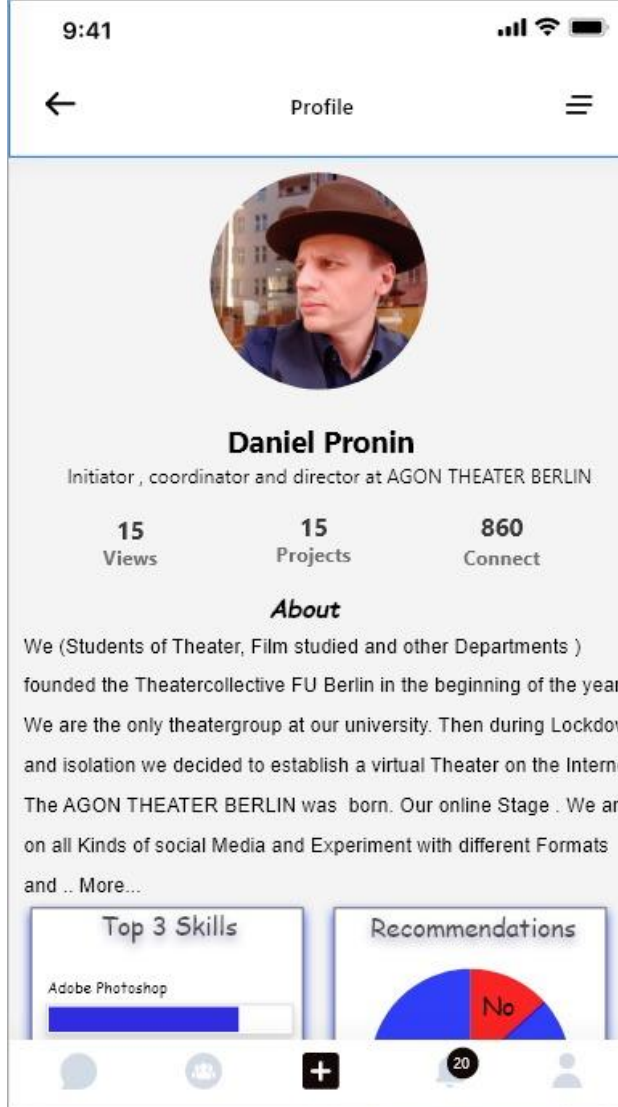

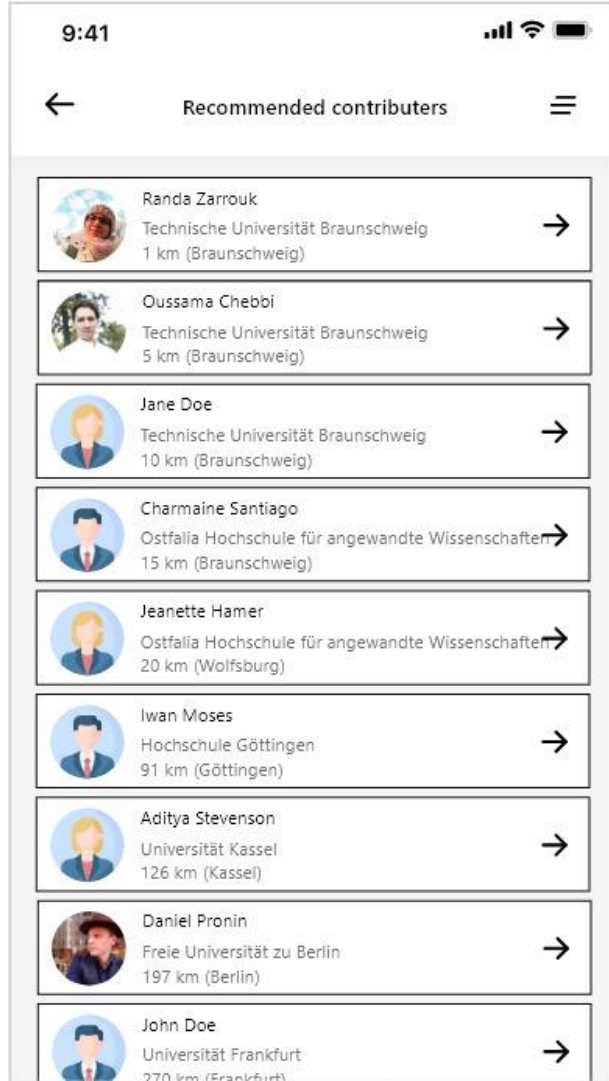

bringing scientists, students, researchers and people with Tech background together with artists of various fields, designers, video and photographers, actors, game creators etc. in order to find the right match for a specific project. The project can be for academic research, student projects or for hobbyists.

Start new or realize existing Projects! Together and interdisciplinary!

How does it work

1. Download and register for free.
2. Decide whether you are a Scientist, Artist, technician or more than one of them.
3. Fill out the registration form with your personal information.
4. You can also click on topics you are interested in, fields of your research topic, hobbies, movies, books or authors etc. Some Data is obliged some is voluntary.
5. Add pictures , connect your Instagram, Facebook, LinkedIn, Spotify, Deezer account to the Profile etc.
6. Specify what area you are looking for? (10km, 100km , Worldwide, online)
7. What fields of knowledge the person you looking for should be.
8. What languages should be spoken?
9. Ready to go!

Prototype Interface

TU Braunschweig (IT Institute und andere Institute), Freie Universität Berlin (Theaterwissenschaft, Filmwissenschaft, Kunstgeschichte) , Universität der Künste (UdK), TU Berlin

Good start for Testing are 1000 Users and 10 donators

Requirements

- App developer.
- Privacy specialist/student
- Security specialist/student
- Marketing specialist/student
- Business specialist/student
- Testing community

We have presented:

- Idea to bring together people for interdisciplinary projects
- starting with connecting students
- talk to higher education institutions if they would work together with such a platform
- providing a social and connecting project management tool
