# DigiEduHack Webinar #4

Webinar expert guests:

**Mart Laanpere,**  
Professor of mathematics and computing education in the School of Digital Technologies, Tallinn University, Estonia

His main focus in research is conceptual design and analysis of affordances of technology-enhanced learning systems and tools, digital competence modelling and assessment, didactics of informatics, also the authoring tools, metadata and repositories for digital learning resources. He is head of the MA programme 'Teacher of Informatics', co-author of national digital competence test, co-author of several informatics textbooks for upper-secondary schools.

Mart has been leading the national curriculum committee for digital competence and informatics in basic and secondary schools in Estonia since year 2000, he was also member of the steering group for Estonian Lifelong Learning Strategy 2020 where he led the development of the action plan for Digital Turn in Schools. He has been contributing as an expert to various European initiatives related to modeling and assessment of digital competence (DigComp, DigCompEdu, SELFIE for Teachers). He is a board member of EDEN Digital Learning Europe and International Council of Educational Media.

**Jukka Sinnemäki,**  
Co-founder, EdTech StartUp Datorium

Co-founder of EdTech startup Datorium. At the moment Datorium team is weekly educating 5000 students of public schools in frames of public-private partnership program. The aim of this program is to bring enthusiastic IT industry experts to schools as teachers and significantly boost digital skills of young people in Latvia.

Mother of 3 daughters, Angela has always found tech-education an important topic, more so as she is constantly facing discriminative and stereotypical situations in Latvian educational system. Datorium has developed a special coding program for girls age 14-19 PyGirls. Angela is also EU CodeWeek ambassador for Latvia and believes technology is a powerful tool that everyone should be able to use to make our world a better place.

# DigiEduHack Webinar #4

Webinar expert guests:

**Karl Saamuel Hollman,**  
Musician and sound engineer, Estonia

Graduated from Tallinn English College, Karl Saamuel is currently studying law in TalTech university. In his free time he usually relaxes by playing disc golf or pool.

He has always loved studying, developing new skills and discovering new things and considers that most of his knowledge that has not come from the traditional education system has reached him through technology.

**Aleksandra Jaworska,**  
Analytics and Business Communication student at University of Bielsko-Biała, Poland

Full-time student, with part-time job. Aleksandra is developing her business skills and knowledge every day, by online research and observations at her workplace.

She also looks for opportunities to meet people with more experience than she has been able to accumulate so far, that is why she took part in EdTech challenges in education and ideation process summer school project. It has been programmed as a dynamic forum of exchange of ideas, so she had a chance to work with people from Spain, Estonia, Czech Republic, and Poland.

Aleksandra wants to leave her mark on the world, and she is still looking for the right way to do that, so she moves past her comfort zone every day.
