Emerging technologies for holistic learning (Berlin)

Challenge: Emerging technologies for holistic learning (Berlin)

school-material

learning with gaming and networking

Website for elementary school children, whether reading clips or videos of the teachers teaching. Children will have various play activities that will test their understanding. There will be a social network on the site where students and teachers can communicate and ask questions, share information.

Solution Details

Solution description

Our idea is to create a website where there will be curriculum for elementary school children, whether reading clips or videos of the teachers teaching. Each week the children will have various play activities that will test their understanding, in addition there will be a social network on the site where students and teachers can communicate and ask questions, share information and more..

Solution context

Lack of concentration and lack of monitoring by students of material being studied

Solution target group

Elementary school children

Solution impact

Have students follow the material being taught and be active rather than passive

Solution tweet text

Learning with Gaming

Solution innovativeness

Haven't done that

Solution transferability

Haven't done that

Solution sustainability

Haven't done that

Solution team work
