Solution Details

Solution description

We will make a social media platform where people can get answers of their related questions by just one click. we hire some professional experts to guide people in making assignments and projects. The students can chat with professional teachers and resolve issues. Get digital by one click

Solution context

75% of the country has 3G coverage and as of now most urban centres have blanket 4G coverage; yet people don't use the internet as they don't know how or they don't know the benefits.

40% of mobile phone owners who do not use the mobile internet had difficulty understanding how to use their mobile handset.

Solution target group

For people working/students

- Able to find correct information;
- Can further explore ideas;
- Make use of the internet to participate in event.

For everyday life

- Able to communicate to others;
- Can voice your opinion and speak out;
- Pay bills and transfer money safely;
- Use simple tools such as google maps to find your way;
- Buy items and grocery online.

Solution impact

We will help the students who have questions but they can't find proper answers, we will help them in making assignments and projects. We will give them path to develop your skills and clear your concept. we'll upload some books related to every field so students can easily access to them.

Solution tweet text

ever know someone who's clueless on the internet? teachers, elders or youngsters who don't know how to do basic tasks like editing a document? what about paying bills online? the edute app is here to help you! learn all the online available tools to help you become more digitally aware!

Solution innovativeness

- Provide content in local languages, Urdu, and english;
- Content both in video/audio form, and written to help disabled people and for convenience;
- Is for all ages, teaches how to be responsible on the internet, how to find reliable information and how to use tools to help with everyday life.

Solution transferability

it can be used for teaching a number of basic things like manners on social media and finding reliable information

Solution sustainability

a simple download can help people be less dependent on other people. if everyone does for example online banking so much time will be saved for people and banks don't have so much money on keeping banks open all the time,, this idea can be used for a variety of different things

Solution team work

it was difficult to communicate and assign work between us
