Solution Details

Solution description

Off-online activity for students.

Our challenge is how to connect offline and online activities for students at the same time.

We have a request from the parents that all students should be the actively part of lessons, if they stay at home.

And our proposal is to add students to the lesson via Teams using webcamera.

Solution context

Problems:

Planning activities that permit to collaborate students.

Following time-managment.

Supporting parents.

Solution target group

Students, teachers.

Solution impact

Add the istruction to students and parents.

Add the webcam with movetracker.

Add the tutorial to teachers.

Solution tweet text

Mixing off-online activities with webcam.

Solution innovativeness

Opportunity to be present at the lesson from the school and other place at the same time and collaborate with teacher and classmate.

Solution transferability

Maybe in kindergarden and universities.

Solution sustainability

Implement into the school curriculum.

Solution team work

It was cool and fun. Yes, we are going to continue.
